

# **FADE•NOT® POLYCARBONATE**

PROJECT:	CONTACT:
FIXTURE/WATTAGE/BEAMSPREAD:	
LOCATION:	LENS SIZE:
ACCESSORIES:	COLOR:

**Fade•Not® Polycarbonate** is manufactured using only the best commercial grade polycarbonate. UV absorbers are added to the coloring process to prevent premature degradation, providing the longest life possible. **Fade•Not® Polycarbonate** can last years when used within standard operating temperatures. FX can coat a variety of plastic sheets and strips. All plastics are suitable for wet locations. Use **Fade•Not® Polycarbonate** on fluorescent fixtures, low temperature architectural or theatrical fixtures, inside fluorescent or low temperature bollards, and temporary outdoor applications such as holiday or theme lighting.

## **Substrates**

We can coat yours or ours.

## **Plastic-Sheets**

Our stock includes 2mil, 5 mil, 20mil and 30mil Sheets.  
We can also get .0625 thick and up. Call for more sizes.

## **Color Selection**

Any color or combination of colors from any theatrical color media can be specified. To aid in color decision making Special FX recommends mocking up with color. Once color is determined, FX can supply your project with product samples at little or no cost. We can also match provided color samples.

## **Specifying Fade•Not® Polycarbonate for your project**

All FX products are custom manufactured for the specified lighting instrument. Contact Special FX Lighting by phone, fax, or email with project specifications, fixture information and color, which will be reviewed to recommend the longest lasting, most cost-effective product for your application.

## **Order Lead-time**

Standard order lead-time for in-stock sheets is two weeks from receipt of Purchase Order.  
Lead-time for non-stock sheets is approximately four weeks from receipt of Purchase Order.
